

## מדריך ליצירת הערות שוליים / הערות סיום באמצעות RefWorks

קיימים סגנונות בהם ניתן ליצור הערות שוליים, כגון: Turabian, MLA ועוד. על מנת לבדוק האם בסגנון הציטוט שבחרתם משתמשים בהערות שוליים בחרו בתפריט הראשי Tools (כלים) ואז Output style manager (עורך סגנונות ציטוט) **(1)**

בחרו מתוך הרשימה את סגנון הציטוט המבוקש, סמנו אותו ולחצו על Preview Styles (תצוגה מקדימה). **(2)**

אם טבלת סגנון הציטוט כוללת notes, ניתן להפיק הערות שוליים/סיום. (3)

Refworks משתמש בכלי הערות השוליים של Word. לאחר שבדקת שסגנון הציטוט מאפשר יצירת הערות שוליים, הפעילו את תוכנת word וכן את התוסף Write-n-Cite.

תוך כדי כתיבת המסמך, כאשר תרצו להוסיף הערת שוליים, לחצו בתפריט של Word הוספה (Insert) ואז הפניה (reference) ובחרו הערת שוליים / הערת סיום. אשרו את אופן תצוגת ההערות. (4)

**Key Words:** Bayes' Theorem; Diagnosis; Predictive value

**1. Introduction**

The standard practice of teaching clinical epidemiology <sup>(\*)</sup>includes acquainting students with the concepts of assessing diagnostic test characteristics. It is often based on a single 2X2 table (Table 1) from which all diagnostic test characteristics are calculated, i.e., the sensitivity, specificity, positive predictive value (PPV) and negative predictive value (NPV). Such a presentation in one table is potentially confusing. In fact, test performances in two populations are of interest, and in two stages: First, the evaluation in a selected study population in which the study groups are defined by the disease status (persons with the disease and persons without disease are compared), i.e., a case control study. Based on pre-determined numbers of

המסמך עובר באופן אוטומטי לגוף הערת השוליים/הערת הסיום. בשלב זה עברו לחלון Write-n-Cite ובחרו את הפריט שתרצו לצטט. **5**
